BLENDED FAMILY

Conceived and crafted exclusively for aficionados, collectors and connoisseurs, the Hasselblad Stellar II compact camera is designed to combine artistry, craft and technology.

OUTER LIMITS

The camera features new near field communication technology and integrated Wi-Fi for easy image sharing. The device also boasts a 3-inch high-resolution screen with an increased dynamic range of motion negative-45 degrees downward or 84 degrees upward.

RAIN OR SHINE

To overcome extreme light environments, an anti-glare coating on the camera's lens increases visibility.

NUMBERS GAME

The 20.2 megapixel Wi-Fi model can capture moments in almost any light and comes in four different grip variations: olive wood, walnut, padouk wood and carbon fiber. The camera also boasts HD 1080/60p video and 3.6x optical zoom capability.
